The information within the XYZ-Wellbeing web site is intended to help both practitioners and patients make better health care decisions and enable patients to take greater responsibility for their own wellness.

XYZ-Wellbeing is not responsible for the outcomes of your decisions resulting from the use of the information, including, but not limited to, your choosing to seek or not to seek professional medical care, or from choosing or not choosing specific treatment based on the information.

The information provided in links from this website is independent and does not constitute a medical recommendation. It is intended for informational purposes only, and no claims, either real or implied, are being made. Please use the disclaimer link at the bottom of the page for full details.

This system has been written and presented to you strictly for informative and educational purposes only. The information conveyed herein is based solely on ongoing research. Dr. Pablo Paul Rana is not a traditional medical doctor, he is referred to as doctor by the people he helps do alternative therapies for, he is a researcher/scientist.

In combining this system, we are considered Holistic Practitioners.

Dr. Pablo has created a new breed of Practitioners that he has hand-picked and trained, they are called XYZ Practitioners, or RANA Practitioner. Other Doctors employed by us, you will see MD. after their name or retired MD if they are no longer registered.

Holistic or Holistic Practitioner: One who looks at the body's problems as a whole and not just focusing on one area; a practitioner that chooses practices which encompass the mind, body and sole.

Neither Dr. Pablo, XYZ nor XYZ-Wellbeing, The XYZ System or either of its independent XYZ-Wellbeing Practitioners, or consultants, or suppliers, make any claims whatsoever as to any specific benefits occurring from the use of this system or supplies. In no way should the information revealed herein be construed as an endorsement, recommendation or prescription for the use of any nutrition or nutritional supplements as a healing or curative specific for or in relation to any pathology.

The information presented herein, should not, in any manner, be used as a substitute for the advice of your own physician or a one-on-one consultation from XYZ-Wellbeing's team of doctors that are friends of the program or Dr. Pablo in person.

XYZ-Wellbeing Practitioners and consultants deal solely in life and or health enhancing nutritional supporting products. It is not our or their intention, nor will we, or they, use these mediums to diagnose or prescribe any products or parts of this system for any medical condition.

The value of, and the benefits and results derived from, the use of this system in part or in full, are subjective, due to variable individual health factors and their metabolic differences. If you choose to use any service or system we offer no guarantees.

Therefore, no guarantees of any kind are made or implied as to any specific benefit or result. Testimonials from enthusiastic users are for your information only and are not meant to imply that you will experience similar benefits or results.

In acting upon the information presented in this article or presentation, you the reader should understand that you are acting with full knowledge that a medical professional should be consulted for medical problems.

We make no claims of expertise in any field, we are simple people sharing information we have discovered that we believe to be true, and we believe everyone should be made aware of this. There are those who would disagree with this information; it therefore may sometimes appear to be controversial. You must make up your own mind, run with your own feelings, and base your decisions on medical advice and research that you have done personally.

The XYZ group of companies, business, staff, and advertisers and promoters, do not promote laetrile, cesium, High pH therapy, ozone therapy, hyperbaric therapy, colonic therapy or any of the services we offer, nor any of the products mentioned herein, as a cure for cancer. All of the products we mention are regarded as metabolic agents or vitamins used in nutritional therapy and prevention. Our information, as well as success stories, comes from journals and letters written by medical doctors and people who have used metabolic therapy and who wish to share their experiences with others. It is important to realize that one must exercise caution in evaluating them. We share them with you, not to suggest that you will have the same experiences as the authors, but because we feel you have a right to make your own evaluation.

Government agencies would rather we withhold these stories from the public because, allegedly, they constitute "unproven medical claims." However, as stated previously, the only claims we make are that this information is authentic and that the people who wrote them or videoed them were genuine people, and that it is their information as they say it, and they are real stories and not actors or made up stories.

Truth is not truth unless it is the "whole" truth, and these health success stories and scientific studies are just as much a part of the truth as any success story or scientific study experienced by orthodox medicine.

Free men and women are entitled to have access to “all” the information available so they can make intelligent and informed choices in matters of their own health.

Therefore, we are sharing these success stories as an exercise of our right to freedom-of-speech and your right to freedom-of-information.

The information contained in this website is intended for educational purposes only. All the products mentioned in this website are intended solely as food and dietary supplements to enhance general health and to reinforce the body’s own defense mechanisms against disease. Please be informed that by providing you with this information we do not attempt to diagnose, treat, cure, or prevent any disease. You should not construe anything in this website to be medical advice regarding any specific disorder. Before applying any therapy or product to your health problem, you may want to seek advice from a health care professional. Most of this information does not carry the approval of organized medicine. In the U.S., The Food and Drug Administration, the American Cancer Society, and the American Medical Association have labeled it “fraud” and “quackery.”

This is not medical advice or a prescription. If you decide to use this information with or without your doctor’s approval, you have the legal right to do so; however, no one but you yourself can assume this responsibility. Vitamins may only be beneficial if your diet is or has been inadequate.

Doctors, who have seen the improved or recovered using this system, have suggested that they have been healed due to the placebo effect. We say, we don’t care what improves your health, as long as you improve it.

It is our strong belief that we can contribute to the success, or at the very least, improving your health, with your own placebo. As we say, if the body has the ingredients to heal as Nature intended it can and it will!

We do not claim or imply that we have any answers. We do however believe if you do everything that is detailed in The XYZ System, you may be on the way to “making changes for life”
